Education

The University of Texas at El Paso (UTEP)

El Paso, TX

Bachelor of Engineering in Computer Science, Minor in Mathematics

GPA: 3.62

2017-2021

Certifications

- AWS Certified Solutions Architect - Associate

Experience

Applied BAS - **Niagara Developer / Software Engineer**

Dallas, TX

Oct 2022 - Current

- Architected and deployed cloud-based software platforms leveraging AWS, FastAPI, Java, and Next.js to support enterprise building automation and operational workflows.
- Designed and implemented ETL microservices integrating accounting, service management, and operational systems, improving data synchronization performance by 18%.
- Developed centralized data pipelines and transformation services supporting company-wide reporting and analytics initiatives.
- Led migration and modernization of company web infrastructure using React, Next.js, NGINX, and AWS-hosted services, improving performance, SEO, and maintainability.
- Engineered secure remote access solutions for Niagara building automation systems utilizing AWS networking, reverse proxies, VPN technologies, TLS encryption, and cloud security best practices.
- Designed and deployed cloud-hosted Niagara Supervisor environments on AWS EC2, enabling secure multi-site building management and remote operations.
- Developed custom Niagara Framework modules in Java for equipment scheduling, device management, alarm processing, and facility automation workflows.
- Built internal communications services using FastAPI, PDF generation frameworks, and cloud APIs to automate reporting, notifications, and customer communications.
- Implemented cryptographic code-signing automation tools in Python, reducing software release and signing overhead by approximately 20%.
- Collaborated directly with executive leadership to evaluate cloud architecture, cybersecurity initiatives, automation strategies, and emerging AI technologies.

Applied BAS - **Software Engineer Intern**

Dallas, TX

Jun 2022 - Sep 2022

- Led optimization of iOS Service Report Manager app, enhancing PDF generation with dynamic elements and resolving critical bugs, resulting in 30% improved app performance.
- Designed and implemented a high-performance mailing communication platform using FastAPI, streamlining internal and external communications when invoked by the IOS software.
- Collaborated closely with CEO and managers to propose and implement productivity-enhancing services, optimizing existing operations and improving overall efficiency.

Skills

- Skills: Java, Python, JavaScript, AWS, FastAPI, Spring Boot, React, Next.js, PostgreSQL, Docker, Linux, Git, Niagara Framework
